

MS Blaster Worm

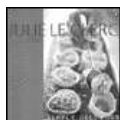

A new worm caused havoc around the world during August, spreading quickly to Windows XP, NT and 2000 systems which did not have the Microsoft Security Patch.

Quicksilver quickly blocked the ports that this worm infects on, to slow down the infection rate, and informed all internet customers by email.

If you are running Windows XP, 2000 or NT, and have still not applied the patch, please visit <http://windowsupdate.microsoft.com>

Beau Software

Beausoft is a Kiwi software company that has gained international recognition for their software built for webcams and digital cameras.

Webcam Watcher is their latest award winning software, hitting the shops soon in NZ.

Webcam Watcher is a powerful demonstration of the speed of Quicksilver's Jetstream ADSL, allowing you to monitor hundreds of webcams around the world and save images for viewing later.

The software comes with 1000 webcams preconfigured, or you can set up your own favourites.

Using Webcam Watcher, you can easily monitor webcams ranging from famous cityscapes, to ski, surf and traffic conditions, or friends and family around the world.

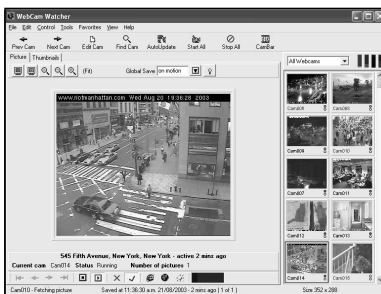

Webcam Watcher also has motion

detection, which makes it perfect for monitoring home security webcams, or even just keeping an eye on the cat when you're not home!

Webcam Watcher will be available on CD in major retail outlets around NZ in the coming months. You can download a free trial version, and purchase Webcam Watcher from

www.webcamwatcher.com
